

G15. Are one-trip textile slings legal to use?

Yes, one-trip textile slings are legal to use, provided they are used with considerable care and in strict adherence with the manufacturer's Instructions for use. They should not be used for general purpose slinging and are for specific loads only.

It is important to note that the slings are not manufactured to any international or harmonized standard. Instead, they are to be made in line with the requirements of:

ISO 12100 - Safety of machinery- General principles for design- Risk assessment and risk reduction

For further guidance, LEEA and ICHCA have developed the following documents:

- LEEA 078-1 - Guidance for users of one-trip slings (General Use)
- LEEA 086 – Guidance for Manufacturers of one-trip slings
